HOW TO MAKE A

# Bostik Rocket

**PARENTAL SUPERVISION  
/ASSISTANCE REQUIRED**

## YOU'LL NEED:

- Printed Template
- A4 Coloured card:  
Fins x1  
Cone x1
- A4 Coloured paper:  
Rocket Body x 1 (sheets)
- Cardboard Roll (or paper  
towel roll, plastic wrap roll  
etc. cut to desired size)
- Greylead pencil
- Scissors
- Craft knife
- Clag Kids PVA
- Bostik Glitter Glue
- Bostik Blu Stik
- Bostik Glu Tape
- Bostik Blu-Tack

## STEP 1

Print the template and find a clean surface to work on. Make sure you have everything you need.

## STEP 2

Cut a piece of coloured paper to the same height as the roll. Make sure it is long enough to wrap around the roll and overlap a little at the end. Use the Blu Stik and glue it to the roll.

Ask a parent to cut four 2cm long slits (using the craft knife) at one end on the roll. The slits should be spaced evenly around the edge.

## STEP 3

Blu-Tack the cone template to a piece of coloured paper. Cut around the template. Once cut out, remove the template and Blu-Tack.

Do the same with the fins.

Trace a 20 cent piece 3 times on some coloured card to create the windows. Cut out.

**TIP:** On the template the dashed lines are fold lines and the solid lines are to be cut out.

## STEP 4

Align the slits on each fit and fit together. Then insert the fins into the slits at the bottom of the roll.

Glue on the 3 windows with the Blu Stik.

Apply Glu Tape to the tab on the cone, roll and attach to form a cone.

Then put Clag Kids PVA along the top edge of the roll and place the cone on top. Leave to dry.

## STEP 5

Decorate with Glitter Glue, then it's... 3... 2... 1... BLAST OFF!
