

ERUPTING VOLCANO

WHAT YOU WILL NEED:

Bostik Clag Paste

Bostik Craft PVA Glue

Plastic bottle

Thick cardboard (50cm x 50cm)

Newspaper

Paint brushes

Craft paint

Stanley knife

Scissors

Dinosaur figurines

Red food colouring (5-10 drops)

White vinegar (1 cup)

Baking soda (2-3 tsp)

PROJECT SHEET:

ERUPTING VOLCANO

STEP 1:

Cut the top and bottom off the plastic bottle. Get an adult to assist with using the safety knife.
Note: Adult assistance required for this step!

STEP 2:

Use Bostik Craft PVA Glue to stick the plastic bottle to the centre of the cardboard. Make sure the plastic bottle is upright.

STEP 3:

Shred the newspapers into long strips.

STEP 4:

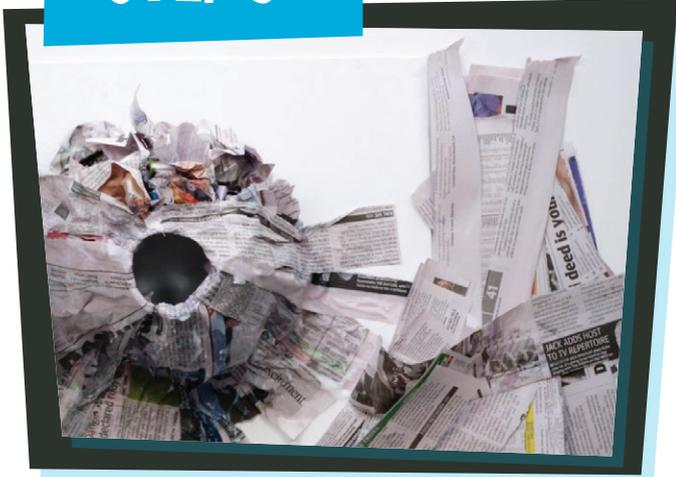

To begin building the volcano, scrunch strips of paper into balls, apply glue and stick them around the base of the bottle. Repeat this step, working your way around and up the bottle to form a base for the paper mache.

PROJECT SHEET:

ERUPTING VOLCANO

STEP 5:

Next, apply glue to a strip of paper and lay it onto the scrunched-up paper - from the top of the bottle to the bottom. Continue this process until the entire volcano is covered. Repeat step 5 twice - you'll need at least three layers of paper! Leave the volcano to dry for 48 hours.

STEP 6:

Paint the volcano.

STEP 7:

Decorate the volcano with dinosaurs.

STEP 8:

Make Your Volcano Erupt.

Take your volcano outside - this could get messy!
Pour the baking soda into the top of the volcano. Add the red food colouring to the white vinegar, tip it into the volcano, and watch it erupt!
